### **Development of Accelerated Bridge Construction Standards – Phase Two**

July 16, 2008

To whom it may concern:

This letter is being forwarded to all contractors, fabricators, suppliers, and consultants who may wish to give input into the subject project. UDOT has contracted with CME Associates, Inc. (CME) for the development of Accelerated Bridge Construction Standards. CME will be working with UDOT Structures Design to develop these new standards.

This project is on a fast track with a timeline of approximately 9 months. To have time to apply your input and to produce quality standards within this timeframe, the project team requests your support in this effort. Please inform the necessary members of your staff and advise them that they may be contacted by CME to discuss various aspects of these standards. Your timely cooperation in this matter is greatly appreciated and will provide you with a valuable opportunity to give your input into this process.

If you have any questions concerning this project, please feel free to contact the UDOT Project Manager, Jason Henrie (Phone: 801-957-8605) or contact me at 801-957-8556. The point of contact at CME is Michael P. Culmo. He can be reached at 860-290-4100 or at [culmo@cmeengineering.com](mailto:culmo@cmeengineering.com).

Sincerely,

A handwritten signature in cursive script, appearing to read "R. Miller".

Richard Miller- UDOT Structures Design
